

GET THE HELP YOU NEED WHEN YOU NEED IT MOST

The Cigna Designated Substance Use Treatment Provider program for Morgan Stanley is here to help.

Some of life's challenges need extra help, especially if you or a loved one are coping with substance use disorder. As part of your health plan administered by Cigna, you have coverage to get the assistance you need to deal with substance use challenges. This includes treatment at a health care facility for substance use disorder.

Choosing the right health care facility is an important decision. To help you and your treating provider make this decision, Cigna has identified in-network providers that provide quality, cost-effective care.

Note: As part of your Morgan Stanley behavioral health benefits, if you use a Cigna Designated Substance Use Treatment Provider, the plan will pay 100% of eligible expenses after the deductible is met.

These Designated Substance Use Treatment Providers have met certain Cigna measures, based on these factors:

- Available substance use disorder treatment programs:* inpatient, residential, partial hospitalization and intensive outpatient
- Annual admission and readmission data
- Cost data

Did you know?

Some health care facilities offer special treatment programs designed for first responders, adolescents, women only and those with chronic pain. Some have unique treatment options, including music therapy, yoga, equine therapy and art therapy.**

Questions? We're here to help.

Contact us if you need more information.

Just call the number on the back of your Cigna ID card.

For a list of Cigna Designated Substance Use Treatment Providers, please see the chart on the back of this flyer.

* All participating facilities provide an inpatient or residential level of care with a step down to a partial hospitalization program (PHP) or intensive outpatient program (IOP), which are subject to prior authorization. **The following services are generally not covered:** Services considered to be experimental, investigational and unproven and non-medical ancillary services including, but not limited to, educational services, custodial services, vocational rehabilitation and counseling services, religious counseling, work hardening programs and driver safety programs. This is not a complete list of plan terms, and plans may vary. See your plan documents for details of your specific health plan.

** While non-medical ancillary services are generally excluded from coverage under the health plan, they are included with the authorized substance use disorder treatment program provided by the designated providers at no additional expense to the Cigna customer. Boarding expenses offered in regards to covered outpatient programs are available at the customer's expense.

Designated Substance Use Treatment Providers

These in-network health care facilities provide quality, cost-effective care.

An excellent choice

We evaluate facility patient outcomes and cost-efficiency information annually. Using a star ranking system, a facility may receive up to three stars for health outcomes and up to three stars for cost-efficiency. If a facility earns a total of five or six stars, it is identified as a Designated Substance Use Treatment Provider.

Quality designations, cost-efficiency and other ratings reflect a partial assessment of quality and cost-efficiency and should not be the sole basis for decision-making. They are not a guarantee of the quality of care that will be provided to individual patients. You are encouraged to consider all relevant factors and consult with your physician when selecting a provider. Providers are independent contractors solely responsible for care delivered. They are not agents of Cigna.

All Cigna products and services are provided exclusively by or through operating subsidiaries of Cigna Corporation.
